Password reset page

A mobile app wireframe for a password reset screen. The screen is divided into three numbered sections. Section 1 is a text input field labeled 'Username' containing the email 'abc@abc.com'. Section 2 is a black button with white text that says 'Password Reset'. Section 3 is a text prompt that reads 'You will receive an email if you have an account with us. Thank You!'. The top of the screen features a yin-yang icon on the left and an information icon on the right. The bottom of the screen has two navigation arrows, one pointing right and one pointing left.

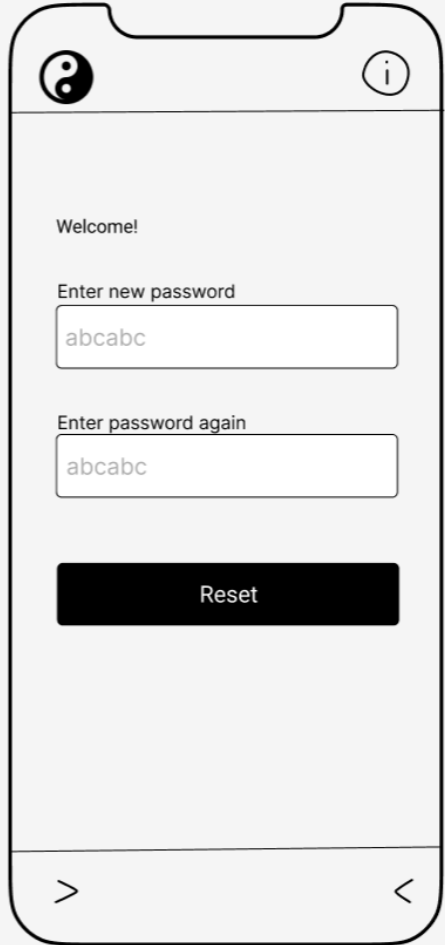

1 Username
abc@abc.com

2 Password Reset

3 You will receive an email if you have an account with us. Thank You!

1.	Username is entered in input field for resetting the password
2.	Button to send email instructions to reset password
3.	Feedback prompt telling users that they will only receive password rest email if they have an account with us.

Password reset page redirected through email

A mobile app wireframe for a password reset screen. The screen is divided into three numbered sections: 1. Greeting to the users, 2. Input field to enter new password, and 3. Input field to reenter new password providing extra set of validation. The wireframe includes a header with a yin-yang icon and an information icon, a 'Reset' button, and a bottom navigation bar with left and right arrows.

1 Welcome!

2 Enter new password
abcabc

3 Enter password again
abcabc

Reset

> <

1.	Greeting to the users
2.	Input field to enter new password
3.	Input field to reenter new password providing extra set of validation

Password reset error page redirected through email

The image shows a mobile app wireframe for a password reset screen. At the top, there is a header bar with a yin-yang icon on the left and an information icon on the right. Below the header, the screen displays the following elements:

- A "Welcome!" message.
- An input field labeled "Enter new password" containing the text "abcabc". Below this field is an error message: "Enter Valid password".
- Another input field labeled "Enter password again" also containing "abcabc". Below this field is another error message: "Renter Valid password".
- A black "Reset" button.

Three numbered annotations are present on the left side of the wireframe:

1. Points to the "Welcome!" message.
2. Points to the error message "Enter Valid password" below the first input field.
3. Points to the error message "Renter Valid password" below the second input field.

At the bottom of the screen, there are two navigation arrows: a right-pointing arrow on the left and a left-pointing arrow on the right.

1.	Greetings to the users
2.	Error prompt below input box if invalid password is entered
3.	Error prompt below input box if invalid password is reentered

Signup page

Signup error page

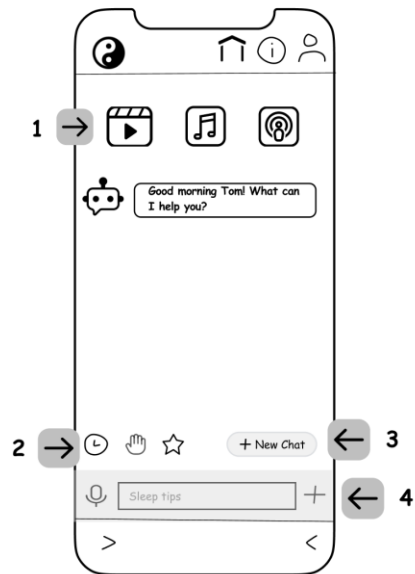

The image shows a mobile app sign-up form with the following elements and callouts:

- Callout 1:** Points to the error message "Cannot contain numbers!" below the Name input field.
- Callout 2:** Points to the error message "Cannot contain alphabet!" below the Phone input field.
- Callout 3:** Points to the error message "Enter a valid email" below the Email/Username input field.
- Callout 4:** Points to the error message "Minimum 8 digits" below the Password input field.
- Callout 5:** Points to the error message "Passwords don't match" below the Confirm password input field.
- Callout 6:** Points to the "Login" button, which is preceded by the text "Already have an account?".

The form includes a "Sign Up" button and navigation arrows at the bottom.

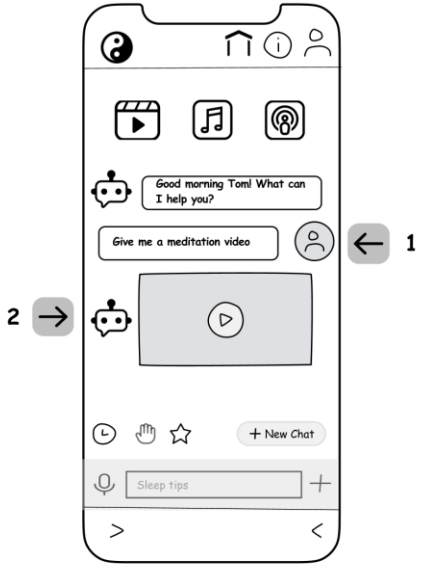

1.	Feedback prompt below input field showing error message in entering name
2.	Feedback prompt below input field showing error message in entering Phone
3.	Feedback prompt below input field showing error message in entering email/username
4.	Feedback prompt below input field showing error message in entering password
5.	Feedback prompt below input field showing error message that passwords don't match

6. If the user already has an account with us, then clicking on login button will redirect user to login page.
